Archery, Disc Golf

PROFILE

After being a Registered Nurse for over a decade, I spent the last 15 months dedicated to becoming a self-taught software engineer. With a strong foundation in Python and Django, I've successfully launched four websites.

EMPLOYMENT HISTORY

Freelance Web Developer

Dec 2023 — Present

Over the past year, I embarked on a passionate journey into web development, self-learning and building several websites. Acquired proficiency in Python, Django, and other web development technologies. I've carried over my analytical and problem-solving skills from nursing to programming.

Transplant Nurse, University of Arkansas for Medical Sciences (UAMS)

Sep 2020 — Dec 2023

Specialized in liver and kidney transplant care at UAMS, ensuring patients received optimal pre and post-transplant support. Demonstrated the ability to adapt to dynamic healthcare environments while maintaining a high standard of patient care.

- Assessed and monitored patients before and after transplant surgery.
- Managed complex medication regimens, including immunosuppressive drugs.
- Provided emotional support and education to patients and their families.
- Coordinated with organ procurement organizations and transplant teams to ensure successful organ transplant.

Orthopedic Nurse, Baptist Health Medical Center

Jan 2014 — Sep 2020

Provided specialized care to orthopedic patients, assisting with pre-operative and post-operative procedures. Collaborated with interdisciplinary healthcare teams to develop and implement comprehensive care plans.

- Assisted in the management of pain and discomfort for orthopedic patients.
- Administered medications and treatments according to physician orders and nursing protocols.
- Participated in interdisciplinary team meetings to discuss patient progress and plan for discharge.
- Provided emotional support and reassurance to patients and their families.

EDUCATION

Associate Degree in Nursing, Phillips Community College of the University of Arkansas

Jul 2009 — May 2013
